

topochemical reaction

Synonym: topotactic reaction

A reversible or irreversible reaction that involves the introduction of a guest species into a host structure and that results in significant structural modifications to the host, for example, the breakage of bonds. Example: The insertion of lithium at 50 °C into the spinel $\text{Li}[\text{Mn}_2]\text{O}_4$ with symmetry $F\ \text{d}3\text{m}$ to yield a layered structure with symmetry $P\bar{3}\ \text{m}1$.

Alternative terms: topotactic reaction, insertion reaction.
